Hematology Section Chief at VA Palo Alto
Tenure or Medical Center Line, Associate Professor or Professor
Department of Medicine

The Veteran’s Administration Palo Alto Health Care System (VAPAHCS) and Stanford University are recruiting an exceptional academic leader to serve as section chief for hematology. The ideal candidate will be an accomplished physician investigator with a national or international reputation, who will lead the research, clinical, and educational activities of the Section. Experience directing and managing a research agenda would be highly preferred.

The section chief will be expected to provide academic oversight for a dedicated faculty and clinical care for a wide variety of hematologic and thrombotic conditions. Experience with medical housestaff and fellowship training is required. The section chief will be responsible for faculty development and will provide oversight for the administration, and clinical care and treatment of veterans within the VAPAHCS. The section chief will be expected to work closely with the Chief of Hematology at Stanford to strengthen the clinical activities, research portfolio, and highly competitive fellowship program. Appropriate resources will be available to accomplish these goals. The chief will have a Stanford faculty appointment in the Department of Medicine, Division of Hematology, at the rank of Associate Professor or Professor, in the University Tenure Line or the Medical Center Line, as determined by the qualifications of the candidate.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill.

The VAPAHCS offers a highly interactive scientific environment with many multidisciplinary centers of excellence and state-of-the-art core facilities including animal care, imaging and genomic research activities. Successful applicants must hold a MD or MD/PhD degree and be board-certified or board-eligible in Hematology and/or Oncology, and have a history of significant peer-reviewed funding.

Applicants should send a CV, a brief summary of past accomplishments and future research plans, and the names and email addresses of three references to:

Margaret Wootton
VA Hematology Search Committee
265 Campus Drive, G3141
Stanford, CA 94305-5463

or via email to margaret.wootton@stanford.edu.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women and members of minority groups, as well as others who would bring additional dimensions to the University’s research, teaching, and clinical missions.
